NEW LOUNGE
SERIES

MORE THAN *20 years* OF EXPERIENCE

With more than 20 years of experience, Wellspa has become one of the leading manufacturers of spas and professional therapy equipment in Northern Europe. Our long term commitment and dedication to design and engineering has resulted in a highly competent and experienced engineering team. In-house engineering and design capabilities have been a key in creating innovative high quality spas at Wellspa. In addition to world-class development team, all spas are manufactured by an experienced production personnel to the highest quality standards guaranteed.

Wellspa is striving to provide our customers with the best home spa experience by offering modern design, the latest functional innovations and reliable high quality.

LOUNGE – LUXURY SPAS

New Lounge series of luxury spas are the result of dedication and continuous development work in spas for over two decades. During this time period our product development team has been involved in creation several ranges of high quality outdoor spas and wide range of professional therapy equipment.

In addition to unique design, Lounge series was created through comprehensive engineering using extensive manufacturing experience and careful analysis of the latest user feedback.

Wellspa Lounge line of luxury spas combine new modern look with uncompromised performance, offering in addition to eye-catching design, well-tested user comfort, effective hydro-massage, durability for years of trouble free usage and exceptional energy efficiency. All carefully selected materials and components used in our spas are of the highest quality. Lounge outdoor spas have been tested extensively to ensure long-term, carefree, around year use in varying weather conditions.

UNFORGETTABLE *good times*

Wellspa outdoor spas have been created to offer healthy lifestyle and promote an active way of spending free time together with family and friends. All aspects of spa design contribute to deliver a dream spa that offers valuable functionality and helps create magical atmosphere for absolute relaxation and memorable enjoyment. In addition to soothing hydro-massage functions lounge spas deliver unique atmosphere and ultimate comfort.

handcrafted QUALITY

At Wellspa we value skills, experience and dedication that deliver personal touch to every detail of a spa. That is why our tailor-made spas offer more customisation and higher quality than of larger productions. Traditionally we have been engineering and manufacturing spas for demanding Scandinavian weather conditions. Since harsh conditions demand choice of higher quality materials, better durability and higher efficiency, we offer more value and reliability than most.

All our spas are handmade by well-trained craftsmen with years of experience of building high quality spas. Every stage of production is well controlled, tested and recorded and all spas pass rigorous functional and safety testing before delivery.

LOUNGE•2

Lounge 2 luxury spa is an ideal compact home spa with modern sleek outer looks, well designed interior for seating comfort and equipped with all quality functions a premium outdoor spa may offer. Lounge 2 comes with two lounge seats and two additional seats providing for the most relaxing hydromassage experience, colorful waterline mood lighting for enjoying bathing outdoors during any season.

In addition to standard spa functions, all Lounge serie spas are equipped with a unique exterior LED lighting system offering a magical light source for a terrace or garden while using the spa.

LOUNGE • 4

Lounge 4 is a luxurious outdoor spa with modern timeless design and ample interior space providing for two master lounge seats and four regular seats. Lounge 4 is an ideal health spa for a group of friends or for a larger family to have memorable spa experiences when enjoying the pleasures of soothing hydromassage in mood lighting with good music.

Unique exterior lighting system is offered with either a multi-color LED lighting system or with warm white LEDs. The lighting system may be used while using a spa or as a lighting source for a terrace or garden.

CONFERENCE

Conference offers in addition to a straight-lined modern outer design well configured ergonomic seating with four master seats and four additional seats for the enjoyment of invigorating hydromassage while socializing. Conference is an ideal way of spending memorable time together with friends enjoying healthy soothing warm hydromassage and great company during any season of the year.

Spa-getaway with friends

BATHING *in style*

Minimalist timeless design of Lounge spas blend well with variety of architecture. The modern outer look with straight lines provides for virtually unlimited possibilities of the spa cabinet finishing and easier spa installation into any location - whether built into a terrace, placed next to a house or to the garden. Lounge spas were designed keeping in mind that user expectations include in addition to uncompromised functionality, durability and energy efficiency also modern design.

All Lounge spa prototypes were thoroughly user tested already during development phase before finalizing the interior design. Through testing we ensured that the final interior design and jet placement offers effective hydromassage and ergonomic seating for users with different height. In order to offer more, Lounge spas boast superior construction guaranteeing durability at the highest level.

UNIQUE *spas* BUILT UNIQUELY

Wellspace Lounge outdoor spas have been designed for challenging Scandinavian weather conditions, but these benefits of extra-strong construction, superior thermo-insulation and weatherproofness are also highly valuable in moderate climates.

EXTRA STRONG CONSTRUCTION

Lounge spas are exclusively built on strong galvanised steel frames – this is to guarantee a very rigid structure for many years of operation. Our engineers preferred steel framing to wood, composite or aluminium, since this is the best material offering maximum construction durability.

SUPERIOR THERMO-INSULATION

Every Lounge spa comes with superior thermo-insulation from a bottom to a top to deliver substantial energy-efficiency. With air-tight exterior paneling in conjunction with a thermo-insulation we ensure wind resistance and minimum energy loss through heat transmission. For superior thermo-insulation of Lounge spas we use extra thick insulation paneling of 6 cm Kingspan with heat reflector surfaces – this guarantees the highest insulation standard and saves users money comparing with standard spas. In addition to significant energy savings, superior thermo-insulation neutralizes noise of spa equipment making Lounge spa's probably one of the quietest spas on the market. In addition to these everyday benefits, extra thermo-insulation also provides an additional insurance policy, since it prolongs the freeze through point during possible winter power outages and hence lowers significantly the risk of very costly freezing damage to a spa piping and equipment.

SUPERIOR GROUND ISOLATION

All Lounge spas are built on a triple layer bases with thermoformed ABS bottom and top of the base and thermo-insulation in between. Special construction of the base ensures the absolute ground hydro-isolation and superior thermo-insulation as well.

EXTRA THICK THERMAL SPA COVERS

Lounge series spas are offered in standard with thick heavy-duty foam insulated vinyl finished covers for maximum heat insulation. Lounge spa covers are built with interior structural framing for exceptional durability including all necessary built-in safety features.

WELL TESTED INTERIOR COMFORT

Lounge series spa interiors have been designed with care and thoroughly pre-tested already during prototype phase of development to ensure ergonomic seating and ideal jet placement for users with different height. Built-in additional foot support for Lounge 2 and Lounge 4 were added as a result of testing to provide most comfortable bathing also for shorter users.

These exclusive spas feature adjustable, high-volume jets with rotation effect. Thoroughly pre-tested jet placement is to ensure the most enjoyable balanced full body massage with emphasis on the back and reflexotherapeutic massage for soles of the feet.

NEW BALBOA SPA CONTROL

Lounge spas are fitted in standard with the latest Balboa control panels featuring large back-lit LCD touch displays and simple user logic to ensure ease of use. Balboa electronic systems guarantee flawless control of all functions including water filtration with ozone, heating, hydro-massage and lighting. In addition to control panel user friendly interface for every day spa use, Lounge spa controls are easily accessible through the BWA app on Your IOS or Android device from a distance through WIFI. Spa electronics may be reached from anywhere at any time if adjustment of the water temperature or configuration of the filtering cycles is needed.

• Balboa control panel

DUTY FREE FILTRATION

All Lounge spas all feature double cartridge filters with high capacity filtration of particles up to 5 microns. In addition to a more effective water filtration, extra filtering capacity means that cartridge filters do not need as often cleaning and changing. Pure water is guaranteed through ozonators with highly effective oxidizing of water and combined with the double cartridge filtration.

SPECIAL ATMOSPHERE

In addition to world-class hydro-massage systems, Lounge spas are fitted in standard with exclusive waterline colourful LED lighting systems to create a special magical atmosphere every time you enjoy the spa.

As a true novelty, Wellspa offers exclusively to Lounge spas unique external lighting system around the exterior of the spa, creating a lighted area all around the spa while using the spa or could serve as outdoor lighting whilst the spa is not used.

• Waterline LED lighting

VALUABLE FEATURES *for your* SPA

AUDIO SYSTEM

Wellspa offers probably one of the best water-proof audio systems available for spas. Audio systems have been designed to withstand challenging conditions of an outdoor spa and at the same time to deliver flawless surround sound through pop-up speakers and a sub-woofer. Whether enjoying music from your favourite radio station or through Bluetooth system, Lounge spa will capture all your senses and help you create an unforgettable atmosphere of total relaxation.

For added safety and comfort Wellspa offers high quality spa cover lifters, safety handles, towel bars etc.

WOODEN STEPS

Wellspa offers wide sturdy custom made wooden steps with complementing design to the series. Lounge steps with a Lounge handle ensure safety when stepping in and out of the spa during any season.

SPA CABINET FINISHING

Elegant design of a spa and finishing that blends with the surroundings of the installed spa are equally important. Lounge series offer wide choice of finishing options as spa paneling is offered both in quality natural wood and composite finishing.

Natural wood paneling has its benefits of natural look and virtually unlimited finishing options. You are able to choose from four (4) standard wooden panel finishing or have it custom toned that perfectly matches terrace or house finishing colour.

Maintenance free composite panelling with UV protection is the most durable panelling material for all-season outdoor exposure for many years. Wellspa offers brown and grey composite paneling.
